

Merkaba Mysteries

The MERKABA consists of Counter rotating spirals of interdimensional electro-magnetic energy that looks as two overlapping triangles, merkabas are formed in the auric field of people and planets ,enabling biological interdimensional travel and ascension

Merkaba fields are the consciousness carriers by which universal life force and consciousness are circulated within our inner template, dna template and external manifestation.

When the personal merkaba field is damaged as It has been of all earth life since app 200000 bc, the connection to eternal life stream and living source also becomes damaged.

With a damaged merkaba field you:

- Can not ascend through stargates
- Get sick
- Experience death
- Experience separation from God/Source

Merkaba is built in order:

- magnetic counter clock wise,*
negative charge bottom
- electric, clock wise, positive*
electrical charge, top

Magnetic *Merkaba Spiral*
Rotates Counter-clockwise

Electrical *Merkaba Spiral*
Rotates Clockwise

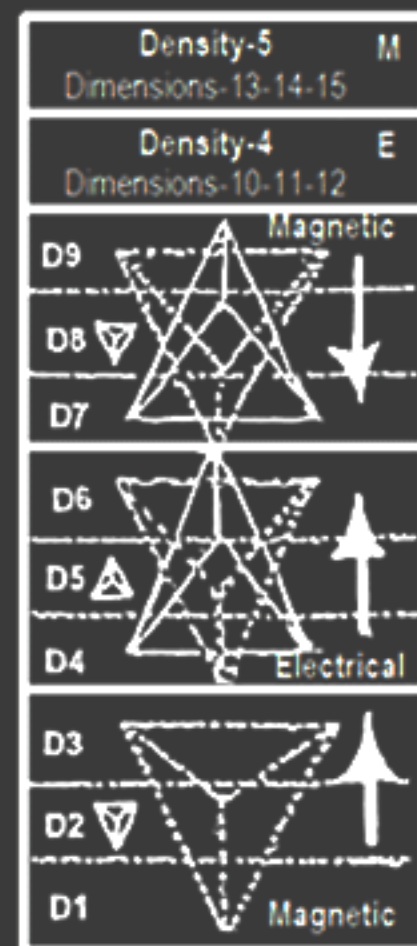

The natural merkaba has specific ratios for the magnetic and electric which is more electrical than magnetic which involves a higher frequency, less dense, self-perpetuating eternal, christos
The inorganic, nnnatural merkaba , is self-consuming, finite, anti christiac.

Merkaba Mysteries

Each dimension of the human body has a dimensional merkaba field, three dimensional merkaba field in one density form one harmonic merkaba spiral in each of the five densities, we usually associate the word merkaba with the phase until the sixth dimension which is magnetic plus electric.

Important to know:

- Distorted teachings are shared by Annunaki, especially in Egypt.
- Channeled merkaba activations are usually distorted.
- It is important to work with you DNA before working with kundalini currents.
- It is important to work with plasma distortions right now.
- We use stargates for physical ascension, the stargates that we are going to use are different ones.
- It is not time for physical ascension yet.
- The “wrong” stargates get you into blackholes.
- It is time to go inner, get to know your inner cosmos, learn how different stars are representing different times and initiations and aspects of yourself, learn to relate with them, learn to inner travel first.
- Heal trauma related with certain stars.
- When your merkaba is working properly you do not need space ships to travel, keep an eye on beings that are sharing about space craft as if it is super cutting edge.

Space time transit or natural stargate passage (inner and outer) is your divine right, if it sounds impossible for you, that is because of distorted programming
